

How could we improve on this...?

...provide a television to watch?

www.aquavision.co.uk

AQUAVISION

is the original bathroom television company. As original designers and having been manufacturing bathroom televisions since 1999, we are probably the most knowledgeable and experienced people in the business.

Our televisions incorporate the latest state of the art screens with the latest and best features. Our televisions were originally designed for use just in the bathrooms, however they regularly appear in kitchens, swimming pool and garden environments, spa's, sauna's, and even living rooms. In fact, they appear almost anywhere.

All our units feature heated screen areas to prevent the front misting up in humid conditions or even freezing up in cold conditions. They come as standard in a unique "Ice White" surround.

As an option, our 15", 17", 26" units are also available in our MirrorVision finish. This makes the television unit resemble a near perfect mirror when the screen is turned off, but becoming almost invisible when the screen is activated.

With a standard product range of 5 screen sizes and 3 glass finishes, plus the ability to build bespoke systems, we offer the most comprehensive range of bathroom televisions on the market.

Aquavision 15.1 with Ice White glass finish

AQUAVISION

AQUAVISION is a completely independent waterproof television that is built to the latest regulations in waterproofing and safety, it is designed to integrate into your bathroom or any other room. With its' slim profile, your AQUAVISION unit can easily be fitted into any stud or solid wall and tiled or plastered up to give that truly 'built in' look that will enhance any area.

THE RANGE:

AQUAVISION® 15"

The original AQUAVISION, this 15.1" screen unit has a traditional 4:3 aspect ratio (standard 'Square' picture, rather than widescreen), a thickness of just 60mm and a size of just 385 x 470mm.

AQUAVISION® 17"

The first of the next generation AQUAVISION, this 17.1" screen with a 16:9 aspect ratio (widescreen, rather than standard 'square' picture) and IPS (In Plane Switching - a fantastic 176° viewing angle in both planes) means we have spared nothing. AQUAVISION is designed to form an integral part of your every day life whether it be in your bathroom, wet room, kitchen or T.V room. This unit has a thickness of just 60mm with dimensions of just 371 x 516mm and has a choice of 3 glass finishes.

AQUAVISION® 26"*

The newest model of AQUAVISION, this 26" screen unit with a 16:9 aspect ratio, IPS and PIP capability (Picture In Picture, allowing you to watch two programmes at once or keeping a close eye on sleeping baby via a baby cam) is our current top of the range. This unit has a thickness of just 110mm and a size of just 492 x 722mm.

AQUAVISION® 32"*

The original AQUAVISION, this 32" screen unit has a 16:9 aspect ratio (widescreen, rather than standard 'square' picture), a thickness of just 120mm and is sized just 571 x 854mm. Only available in MirrorVision® Glass.

AQUAVISION® 40"*

The original AQUAVISION, this 40" screen unit has a 16:9 aspect ratio (widescreen, rather than standard 'square' picture), a thickness of just 135mm and is sized just 692 x 1049mm. Only available in MirrorVision® Glass.

*AQUAVISION® 26", 32" & 40" are HD ready with picture resolution 1366 x 768 and include Digital tuners.

- fully waterproof
- remote control
- heated screen
- 3 glass finishes
- mirror option
- wide screen option
- satellite compatible

AQUAVISION Glass Finishes

ICE WHITE

This is the standard finish that all AQUAVISION units come in unless otherwise stated. This is a pure white ink baked onto the glass during toughening to form a very durable finish. Due to the glass being standard float glass, it gives the white a subtle faint green tint. There are 2 simple borders, and the AQUAVISION logo highlighted in a pale grey to enhance the product. The Logo also acts as a window showing you the power status LED light.

BLACK

Exactly as it says, black ink baked onto the glass during toughening, but as with the above, we have applied this to a specially optically clear glass to ensure that the black stays black. There are again 2 simple borders, and the AQUAVISION logo power status LED light.

MIRRORVISION

When the TV is OFF, the glass takes the form of a mirror that is perfectly adequate for shaving, make-up etc. When the AQUAVISION is turned on, the mirror gives way to the screen image which simply appears in the mirror. A fantastic feature for the bathroom/bedroom environments.

AQUAVISION® BESPOKE MIRROR / TELEVISION

The most unobtrusive of our televisions so far, a stamp of understated luxury that will keep you in touch yet apart from the crowd.

CUSTOM FINISHES

These are available to order in almost any finish imaginable. Charges will obviously depend on quantity. Please contact AQUAVISION® directly for further information and pricing. We are also able to supply the MirrorVision glass in bespoke sizes suitable for an enormous variety of projects. Please call the sales office for further details.

AQUAVISION® HEATED TOWEL RAIL / TELEVISION

The new Towel Warmer Series incorporating the high specification waterproof 17" AQUAVISION® LCD television with a MIRRORVISION® panel, built into a bespoke state of the art towel rail. This series is ideal for installation into the most recently completed bathroom with the minimum of disruption with just 4 mounting points. It is supplied as a hydronic rail as standard or as a sealed electric upon request (additional cost). The MIRRORVISION® glass on the front of your towel rail makes the glass look like a mirror when the TV is turned off, and goes almost clear when the TV is on, giving no distortion to the picture.

AQUAVISION® T-1 (Opposite)

Dimensions: H:760mm, W: 500mm
Centre measurement: 470mm

Dimensions: H: 760mm, W: 970mm
Centre measurement: 470mm
Glass panel size: 696.5 x 436.5mm

AQUAVISION - Kitchen

A further version of the popular AQUAVISION widescreen TV, designed for those wanting to install their AQUAVISION into a kitchen cabinet.

Kitchen 17" K6

The AQUAVISION is 600mm wide, as are most kitchen units, and 355mm high. This height is one of the European "standard" heights for doors and would simply be installed into the cabinet carcass in the same way that you would install a microwave oven.

Kitchen 17" PCP

Alternatively the standard 17" AQUAVISION can be simply installed directly into an existing cabinet door. The television has a bespoke back box which enables you to still open and use the cupboard behind.

AQUAVISION - Home Networking

AQUAVISION is very popular in the home networking market due to its versatility as well as its high quality picture and appearance.

With standard facilities such as fully wired scart, S-Video, composite, (and on the 26", 32" & 40", HDTV), as well as low level audio out on all models, the AQUAVISION range is very flexible and will easily integrate into any home networking environment.

Using the AQUAVISION Remote Switch Panel, not only gives you hard-wired options of the 6 most popular features, it also gives you these features on a terminal strip so that you can operate your AQUAVISION via simple closure contacts. In the design stage of the current AQUAVISION, the facility was included to allow space adjacent to the infrared receiver, for you to add a further infrared device. We have also designed the "Remote Eye Kit" which enables further control of SKY etc.

AQUAVISION - Remote Eye Kit for Satellite Connection

For those of you who watch satellite, you will know that you can change channel wherever you are. Why should this be any different in the bathroom? When you are installing your AQUAVISION, you can simply fit the Remote Eye Kit and in conjunction with your aerial distribution system, you will be able to have full control over your satellite system.

AQUAVISION - Remote Switch Panel

The AQUAVISION remote switch panel is exactly what it says, a small switch panel that gives you instant control of your AQUAVISION without having to find the remote control. Ideal for hotels and guesthouses or indeed anyone who does not want any remote controls lying around.

AQUAVISION - Back Box

If you want to install AQUAVISION in a very dusty environment, or in a wall that is knowingly damp, we recommend that you purchase one of these galvanised back boxes. These work well with pre-cast concrete walls as this box can be cast directly into the wall.

AQUAVISION - Television Specifications
