WARNING

WARNING :

The unit is operated at dangerous voltages. The unit may only be opened by an authorized specialist.

All maintenance and servicing work must be carried out by an authorized company. Repairs that are carried out incorrectly could result in fatal injuries to the user. The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING :

To reduce the risk of electric shock do not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified service personnel. To prevent fire or shock hazard, do not expose the rear of the set to rain or moisture. Do not rub or strike the Active Matrix LCD with anything hard as this may scratch, mark, or damage the Active Matrix LCD permanently.

CAUTION:

Unauthorized tampering with the inside of the TV invalidates the warranty. The manufacturer shall not warrant for any damage caused by improper maintenance and repair work by third parties.

Important safeguards for you and your new product:

Your product has been manufactured and tested with your safety in mind. However, improper use can result in potential electrical shock or fire hazards. To avoid defeating the safeguards that have been built into your new product, please read and observe the following safety points when installing and using your new product and save them for future reference. Observing the simple precautions discussed in this operating guide can help you get many years of enjoyment and safe operation from your new AQUAVISION®. This product complies with all applicable regulations and voluntary safety standards.

1. Read Instructions

All safety and operating instructions should be read before the product is operated.

2. Follow Instructions

All operating and use instructions should be followed.

3. Retain Instructions

The safety and operating instructions should be retained for future reference.

4. Heed Warnings

All warnings on the product and in the operating instructions should be adhered to.

5. Cleaning

Disconnect the unit from the electricity supply before cleaning. Do not use abrasive cleaners. Use a damp cloth for cleaning.

WARNING (cont)

6. Water and Moisture

When installed correctly, this unit will be waterproof. We recommend that every couple of months you look at the silicon that is around the glass and make sure that this is still in tact and has not come away from either the glass or the bezel. If there is a any sign of it coming away or any other fault, you will need to remove all the silicone and, after cleaning the unit, re-apply fresh. Leave 48 hours to cure before allowing contact with moisture.

7. Transporting Product

A product and cart combination should be moved with care. Quick stops, excessive force and uneven surfaces may cause the product and cart combination to overturn.

8. Attachments

Do not use attachments not recommended by AQUAVISION® as they may cause hazards.

9. Ventilation

Your AQUAVISION® will, under normal operating conditions, not require any ventilation. It has been designed so that any heat will dissipate through the glass at the front of the unit. This will get hot, but need not cause concern. If the unit is going to be installed in a place other than the bathroom or other domestic room, please consult your supplying dealer. Forced air ventilation will be required if this product is going to be used in a steam room, sauna, or similar.

10. Power Sources

This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your supplying dealer.

11. Power Lead Polarization

This product is equipped with a three-wire grounding-type cord. This is a safety feature. Do not defeat the safety purpose of the grounding-type cord.

12. Power Cord Protection

Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles and the point where they exit from the product.

13. Outdoor Antenna Grounding

If an outside antenna or cable system is connected to the product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. A "face plate" also needs to be installed with an isolating capacitor, to prevent any damage from static.

14. Liahtnina

For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent possible damage to the product due to lightning and power-line surges.

15. Power Lines

An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to avoid contact with such power lines or circuits, as contact with them might be fatal.

16. Earthing the product

This product must be earthed properly to comply with the safety regulations in the country of use. If you are unsure of these regulations, please consult a qualified electrician.

17. Servicing

Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel. If the TV does not operate properly, switch it off and call your dealer. After any maintenance, you will need to completely clean the old silicon off and re-seal the front joints as stated overleaf.

WARNING (cont)

18. Damage Requiring Service

Isolate this product from the mains supply and refer servicing to qualified service personnel under the following conditions:

- a. If the power-supply cord or plug is damaged.
- b. If the glass front has been damaged.

c. If there is ingress of water between the glass and the LCD screen.

d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
 e. If the product has been dropped or the cabinet has been damaged.

f. If the product exhibits a distinct change in performance.

19. Replacement Parts

When replacement parts are required, be sure the service technician has used replacement parts specified by AQUAVISION® or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other safety hazards.

20. Safety Check

Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition and the front seal is in tact.

21. Mounting

The product should be mounted on a wall only as recommended in the instructions.

22. Caution: Modifications

Do not attempt to modify this product in any way without written authorisation from AQUAVISION®.

23. Please note:

The installation of your AQUAVISION® unit should be carried out by a technically competent and qualified person and must conform to all the relevant regulations. If in doubt, please refer to your supplying dealer.

24. Power

This set operates on an AC supply, the voltage is as indicated on the label on the back cover. This appliance must be earthed at all times through the chassis as well as through the power lead.

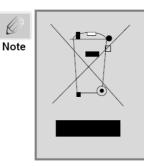

25. Location

This AQUAVISION® must be positioned according to the latest regulations concerning the area it will be installed into. Position your TV so that no bright light or sunlight will shine directly on the screen and locate it at a suitable viewing height. Do not expose the TV to vibration, dust or heat. Also ensure that the TV is placed in a position that allows a free flow of air. The rear or the unit must also be kept away from any moisture.

26. Installation

It is the installer's responsibility to ensure that the Aquavision unit is installed and sealed correctly as stated in these instructions and in the conjunction with the latest safety regulations. Your guarantee will be void if any problems are caused through installation faults or poor sealing. After any maintenance, you will need to completely clean the old silicon off and re-seal as stated overleaf.

WARNING (cont)

This product is designed and manufactured with high quality materials and components which can be recycled and reused. This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

Please, dispose of this equipment at your local community waste collection/recycling centre.

In the European Union there are separate collection systems for used electrical and electronic product.

Please, help us to conserve the environment we live in!

Supplied Accessories

Make sure the following accessories are provided with Product. If you purchased your product as a separate front and back assembly, they would be supplied as follows:-

.....

1. Remote Controller

2. Batteries (2 x AAA)

- Battery Installation 1. Remove the battery cover by pulling it upward in the direction shown by the arrow
- 2. Insert the batteries with correct polarity ("+" to "+", and "-" to "-")
- 3. Replace the battery compartment cover

3. Owner's Manual

Notes for using the remote control

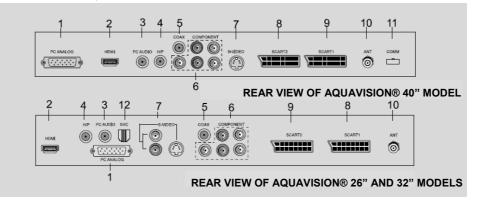

- Make sure that there are no objects between the remote control and its sensor
- Do not place the remote control near a heater or in a damp or wet place
- Strong impact to the remote control may cause operation failure
- Signal from "ie remote control may be disturbed by sunlight or other bright light. In this • case, darken the room
- Install two high-quality 1.5V "AAA" alkaline batteries .
- Never mix old batteries with new batteries
- Liquid leakage from old batteries may cause operation failure

Connectors:

Input/Output Connectors For AQUAVISION® 26", 32" and 40" Models

- 1. **PC ANALOGUE IN (D-SUB)** Connect to the video output jack on your PC, using the PC cable
- 2. HDMI (High Definition Multimedia Interface) IN Connect to the HDMI jack for device with HDMI output
- 3. PC AUDIO IN Connect the audio cable from the PC to the PC AUDIO IN of the set
- 4. H/P (AUDIO/HEADPHONES OUT) Connect a headphone to this socket or use to connect your AQUAVISION® to a multiroom system
- 5. **DIGITAL AUDIO OUT** Connect the cable from the digital audio device to the **DIGITAL AUDIO OUT** of the set
- 6. **COMPONENT IN** Connect to an external device with component output, such as DVD
- 7. **S-VIDEO IN** Connect the output of an S -VIDEO VCR to the S-VIDEO input. Connect to COMPONENT audio jack for sound with component audio cable
- 8. SCART 2 (AV2) Connect the DVD(VCR) player's A/V output to the TV's SCART2 input
- 9. SCART 1 (AV1) Connect a DVD(VCR) player's A/V output to the TV's SCART1 input
- 10. Ant. (Antenna input) Input for TV aerial/cable feed
- 11. **COMM** Communication port for service
- 12. SVC Service port

POWER INPUTS

AQUAVISION® 32" and 40" models

On these models, there is a mains input connector positioned separate to the main input connector. Use only the supplied lead. This unit must be earth bonded via the chassis and the bezel to a suitable building earth point in conjunction with the latest safety regulations. This unit must not be installed within zones 1-3 of a bathroom or other suitably classified environment.

AQUAVISION® 26"

On this model there is a 24V DC power input socket adjacent to the main connectors. Use only the power supply provided with your AQUAVISION®. This unit must be earth bonded via the chassis and the bezel to a suitable building earth point in conjunction with the latest safety regulations. This unit must not be installed within zone 1 of the bathroom or other suitably classified environment.

Controls

All functions can be controlled with the master remote controller

........

Remote Controller

Before you use the remote controller, please install the Batteries as shown on page 12.

 Set the TV off time with the numeric buttons and the ▲/▼ button
- then press the **◄**/**▶** button. Select **On** or **Off** with the **▲**/**▼** button (When the setting is off, the TV set will be switched to standby mode) 7. Press the **▲**/**▼** button to select **On Time** then press the **◄**/**▶** button
- 8. Set the TV on time with the numeric buttons and the A/V button then
- press the **◀/**▶ button Select **On** or **Off** with the ▲/▼ button
- When the setting is On, the set will be switched on automatically to the last selected programme
- 9. Press the ▲/▼ button to select **On Programme t**hen press the ◀▶ button

You can select the first displayed programme with the \blacktriangleleft b or number buttons when the set is switched on automatically

- Press the ▲/▼ button to select On Volume then press the ◄/► button You can select the volume of the first displayed programme with the ◄/► or number buttons when the set is switched on automatically
- 11. Press the **MENU** button to return to the previous menu
- 12. Press the TV/AV button to return to normal TV viewing

Note: The present time must be set for using the Clock function

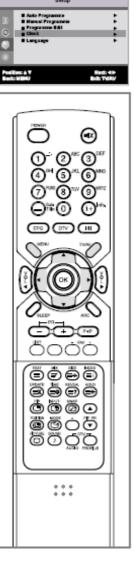

N.R. (Noise Reduction)

The **N.R.** feature improves the picture quality by setting to Mode1 or Mode2.

If you experience noise on a certain program set the **N.R.** to **Mode 1** or **Mode2** for this programme to obtain the optimum picture

- 1. Press the MENU button, select Special
- 2. Press the \blacktriangle/\forall button to select N.R.
- 3. Press the *◄*/▶ button to select **Off, Mode 1** or **Mode 2**
- 4. Press the TV/AV button to return to normal TV viewing

Blue Back

If no signal is being received or the signal is very weak, a blue screen automatically replaces the noisy picture background

- If you wish to continue viewing the poor picture, you must select Blue Back Off
- 1. Press the MENU button, select Special
- 2. Press the \blacktriangle/\forall button to select Blue Back
- 3. Press the ◄/► button to select On or Off
- 4. Press the TV/AV button to return to normal TV viewing

Child Lock

Child Lock menu is necessary in order to disable the buttons on the Remote Switch Panel (optional) It is especially useful to prevent unauthorized viewing

- 1. Press the **MENU** button, select **Special**
- 2. Press the \blacktriangle/∇ button to select **Child Lock**
- 3. Press the **◄**/► button repeatedly to select **On** or **Off**
- 4. Press the **TV/AV** button to return to normal TV viewing

* When the setting is Child Lock On, the buttons except ON/OFF button on the Remote Switch Panel are disabled

* When the setting is Child Lock Off, the buttons on the Remote Switch Panel are enabled

NICAM Reception (option)

If your set is equipped with the receiver for NICAM reception, the high quality NICAM (Near Instantaneous Companding Audio Multiplex) digital sound can be received. Sound output can be selected according to the type of received broadcast as follows by pressing the I/II button repeatedly.

- 1. When NICAM mono is received, you can select NICAM MONO or FM MONO
- 2. When NICAM stereo is received, you can select NICAM STEREO or FM MONO If the stereo signal is weak, switch to FM mono
- When NICAM dual is received, you can select NICAM DUAL I, NICAM DUAL II or NICAM DUAL I+II or MONO.

When FM mono is selected the display MONO appears on the screen.

Sound Output Selection

In AV mode, you can select output sound for the left and right loud-speakers Repeatedly press the **I/II** button to select the sound output

L+R: Audio signal from audio L input is sent to left loud-speaker and audio signal from audio R input is sent to right loud-speaker

22

L+L: Audio signal from audio L input is sent to left and right loud-speakers

R+R: Audio signal from audio R input is sent to left and right loud-speakers

Auto Sleep

If you select **Auto Sleep On** the set will automatically switch itself to standby mode approximately ten minutes after a TV Channel stops broadcasting

- 1. Press the MENU button
- 2. Select the Special menu
- 3. Press the $\overrightarrow{A/V}$ button to select **Auto Sleep**
- 4. Press the **◄**/**▶** button to select **On/Off**

5. Press the TV/AV button to return to normal TV viewing

Note: If the set connects with the external input source in the middle of a lapse of 10 minutes after a TV channel stops broadcasting, Auto Sleep function is automatically cancelled

ARC (Aspect Ratio Control)

You can watch TV in various picture formats; 16:9, 14:9, 4:3, Auto, 16:9 Zoom, 14:9, Zoom, 4:3 Zoom.

Repeatedly press the ARC button to select your desired picture format

16:9 You can enjoy the cinema or general TV programmes through the 16:9 mode

A programme transmitted in 16:9 will be viewed as it is but on a 4:3 transmission it will be magnified to the left and the right so that the 16:9 screen is full

14:9 You can enjoy the picture format of 14:9 or general TV programmes through the 14:9 mode

A programme transmitted in 14:9 will be viewed as it is but on a 4:3 transmission it will be magnified to the top/bottom and left/right

4:3 This picture format is 4 to 3 of general TV

Auto When your set receives the widescreen signal, it will automatically change the picture format that has been sent

16:9 Zoom Magnifies the size of the picture on a 16:9 screen

14:9 Zoom Magnifies the size of the picture on a 14:9 screen

4:3 Zoom Magnifies the size of the picture on a 4:3 screen

Note. In **Zoom** mode, you can adjust the position of the picture with the \blacktriangle/\lor button

(It is possible when the ARC information is displayed on the screen)

In PC ANALOG, HDMI, and COMPONENT modes, you can select

the picture format of 16:9, 14:9 or 4:3

Mono Sound Selection

In stereo reception if the stereo signal is weak, you can switch to mono by pressing the **I/II** button twice. In mono reception the depth of sound is improved To switch back to stereo, press the **I/II** button twice again

Language Selection for Dual Language Broadcasts

If a programme is received in two languages (dual language), you can switch to DUAL I, DUAL II, DUAL I+II by pressing the **I/II** button repeatedly DUAL I sends the primary broadcast language to the loudspeakers DUAL II sends the secondary broadcast language to the loud-speakers

Sleep Timer

You do not have to remember to switch the set off before you go to sleep. The sleep timer automatically switches the set to standby after the preset time elapses Press the **SLEEP** button to select the number of minutes

The display will appear on the screen followed by 0, 15, 30, 60, 120

The timer begins to count down from the number of minutes selected

Note: To view the remaining sleep time, press the SLEEP button once To cancel the sleep time, Select 0 with the SLEEP button

PIP (Picture In Picture)

PIP will let you view two separate source inputs on your TV screen at the same time.

PIP function is available when the main picture is **PC ANALOGUE**, **COMPONENT**, **HDMI** or **DTV** mode

Viewing the PIP picture

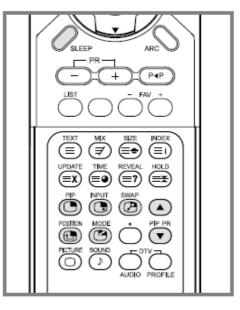

Press the **PIP** () button (Press the **PIP**) button again to turn PIP Off)

Selecting the PIP picture mode.

Press the **MODE** (()) button to adjust the PIP picture mode. Each press of the **MODE** () button selects the 16:1, 9:1, Double Window mode

Moving the PIP picture

Press the **POSITION** ((1)) button to adjust the position of sub picture in PIP mode

Switching the Main and PIP Pictures

Press the SWAP (P) button to switch the main and sub picture in PIP double window mode only

Viewing the External Source Input

Press the INPUT() button to select the input source of sub picture in PIP mode Press the PIP ▲/ PIP ▼ button to select the programme desired in TV mode of sub picture

If you set PIP on in DTV mode, a "Double Window" will be displayed

Calling the Programme List

You can check the programmes stored in the memory by displaying the programme list

Displaying the Programme List

Press the **LIST** button to display the Programme list menu The programme list appears on the screen One programme list page contains twenty programmes as shown in the picture on the right **Note:** You may find some programmes highlighted in blue They have been set up to be skipped by auto programming or in the programme edit mode Some programmes with the channel number shown in the programme list indicate there is no station name assigned

Selecting a Programme in the Programme List

Select a programme with the \blacktriangle/\lor or $\checkmark/\triangleright$ buttons Then press the **OK** button The set switches to the chosen programme number

Paging Through a Programme List

There are 5 programme list pages which contain 100 programmes Pressing the \blacktriangle/ \lor or \checkmark/ \lor buttons repeatedly turns the pages

Digital TV Setup

Programme Information

Programme information is always displayed for a specific period of time whenever you switch channels. You can view the programme information by pressing the Info.(i+) button while watching a programme. Press the Info.(i+) button to hide the banner.

General Information

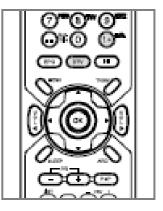

The general information is displayed at the bottom of the screen as follows:

999 Digital 5	7:30
Morning News	O ID
Now >> 07:00 - 08:00	NEWS

Detailed Information

You can see detailed information about the current programme Press the Info.(i+) button

External Equipment Connection

You can connect additional equipment, such as VCRs, Camcorders, etc. to your Aquavision set. Examples are shown below:

Antenna Connection

- 1. Connect **RF Out** on the VCR to the **Antenna Input** on the rear of the Aquavision 2. Connect the antenna cable to the **Antenna In** jack on the VCR
- 3. Press the TV/AV button to select the Antenna Input source.
- 4. Press the PLAY button on the VCR

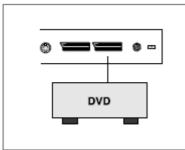

AQUAVISION® 40" connections

AQUAVISION® 26" and 32" connections

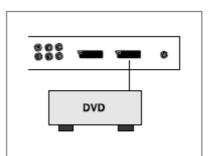

SCART 1

- 1. Connect the **AV Out** jacks on the AV device to the **SCART 1** on the TV 2. Press the **TV/AV** button to select **SCART 1** mode
- 3. Press the PLAY button on the DVD

AQUAVISION® 40" connections

Note: In Scart 1 jack, TV out is available

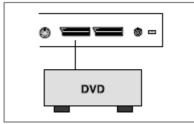

AQUAVISION® 26" and 32" connections

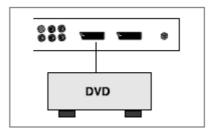

39

External Equipment Connection (cont'd)

SCART 2

- 1. Connect the AV Out jacks on the AV device to the SCART 2 on the TV
- 2. Press the TV/AV button to select SCART 2 mode
- 3. Press the PLAY button on the DVD

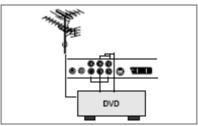

AQUAVISION® 40" connections

AQUAVISION® 26" and 32" connections

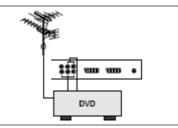

Note: In Scart 2 jack, TV out is available

Component In

- 1. Use a component video cable to connect the DVD player's **Y/Pb/Pr** jacks to the TV's **Y/Pb(Cb)/Pr(Cr)** jacks
- The **Y/Pb/Pr** jacks on your DVD player are sometimes labelled **Y/Cb/Cr** or **Y/B-Y/R** If so, connect the cables to like colours
- 2. Use an audio cable to connect the DVD player's **Audio OUT** jacks to the TV's **Audio IN** jacks. Be sure to use the upper side of inputs that you used for the video connection
- 3. Use the **TV/AV** button to select the **COMPONENT** mode

AQUAVISION® 40" connections

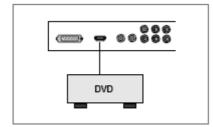

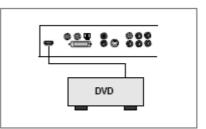

AQUAVISION® 26" and 32" connections

External Equipment Connection (cont'd)

Connecting to HDMI (High Definition Multimedia Interface)

- 1. Connect an HDMI cable between the **HDMI IN** jack on the TV and the **HDMI OUT** jack on the set-top box. Please check that the HDMI source is powered on
- 2. Press the $\ensuremath{\text{TV/AV}}$ button to select $\ensuremath{\text{HDMI}}$ mode

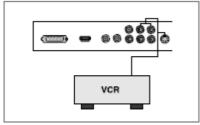

AQUAVISION® 40" connections

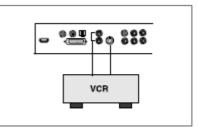

AQUAVISION® 26" and 32" connections

S-VIDEO INPUT

If the optional equipment you are connecting has an **S-VIDEO** jack, you can use an **S-VIDEO** cable for improved picture quality(compared to an **A/V** cable). It is improved because **S-VIDEO** carries only the video signal

The VCR playback picture will appear on the screen

AQUAVISION® 40" connections

AQUAVISION® 26" and 32" connections

Connect to the COMPONENT audio jack for sound with component audio cable

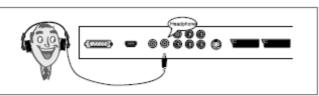

External Equipment Connection (cont'd)

Connecting to Headphones/Audio Output

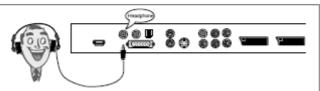

Insert the headphone plug into the headphone jack on the TV

You can listen to the sound through the headphones; no sound from the speaker on the TV To adjust the headphone

volume, use the **Headphone** menu in the **Sound** menu

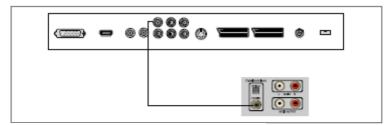

AQUAVISION® 40" connections

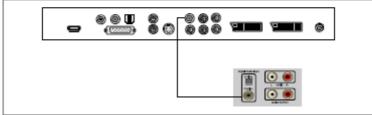

AQUAVISION® 26" and 32" connections

Digital Audio Out

You can use the TV's **DIGITAL AUDIO** (Coaxial) **OUT** jack to connect a digital audio device Use a coaxial audio cable to connect the device's **COAXIAL IN** jack to the TV's **DIGITAL AUDIO** (COAXIAL) **OUT** jack

AQUAVISION® 40" connections

AQUAVISION® 26" and 32" connections

Connecting a PC as a Monitor

This function is possible only when the set is in PC mode Use the $\ensuremath{\text{TV/AV}}$ button on the remote control

Input* - Only in PIP mode, Input menu is displayed

Connecting to a PC as a Monitor (cont'd)

Setup

This function will allow adjustment to the picture of left/right and up/down as required:

- 1. Press the MENU button
- 2. Select the Setup menu
- 3. Press the ▲/▼button to select the desired item
- 4. Press the $\blacktriangleleft/\blacktriangleright$ button to make the desired adjustment
- 5. Press the $\ensuremath{\text{TV/AV}}$ button to exit the menu

H-Position (Horizontal Position)

This function is available to adjust the picture left/right as required

V-Position (Vertical Position)

This function is available to adjust the picture up/down as required

Phase

This function allows you to remove any horizontal noise and clear or sharpen the image of characters on the screen

Clock

This function is to minimize any vertical bars or stripes visible on the screen background - the horizontal screen size will also change

This mediation range is different according to the supported resolution

Reset

This function allows you to return to the good picture reproduction programmed at the factory and cannot be changed

Auto

This function is for the automatic adjustment of the screen position, clock and clock phase. The displayed image will disappear for a few seconds while the Auto-Configuration is in process

1. Press the MENU button

2. Press the \blacktriangle/\lor button to select the Auto mode

3. Press the **◄/**► button

Note: Some signal from some graphics boards may not function properly. If the results are unsatisfactory, adjust your monitor's position, clock and clock phase manually

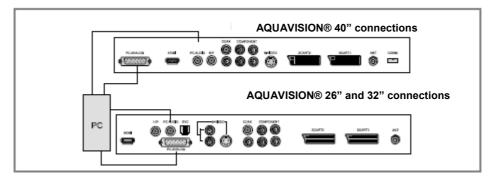

45

Connecting to a PC as a Monitor (cont'd)

PC INPUT

- 1. Connect the **PC IN** cable (D sub cable) from the monitor output socket of the PC to the **PC ANALOG IN** socket of the set
- 2. Connect the **PC AUDIO IN** cable from the PC to the **PC AUDIO IN** of the set
- 3. Press the TV/AV button to select the PC-ANALOG mode
- 4. Switch on the PC, and the PC screen will appears on the set The set can now be operated as a PC monitor

Resolution

Mode	Resolution	Horizontal frequency (KHz)	Vertical frequency (Hz)
VGA	640 × 480	31.5 KHz	60 Hz
SVGA	800 × 600	37.9 KHz	60 Hz
XGA	1024 x 768	48.4 KHz	60 Hz
WXGA	1280 x 768 1280 x 768 1360 x 768	47.4 KHz 47.8 KHz 47.7 KHz	60 Hz RB 60 Hz 60 Hz

a. If possible, use the VESA 1360x768@60Hz Video Mode to obtain the best image quality for your LCD monitor. If used under the other resolutions, some scaled or processed pictures may appear on the screen

b. Some dot defects may appear on the screen, like Red, Green or Blue spots. However, this will have no impact or effect on the monitor performance

Note:

a. If the set is cold, there may be a small "flicker" when the set is switched on.

This is normal, there is nothing wrong with the set. b. Some dot defects may appear on the screen, like Red, Green or Blue spots.

However, this will have no impact or effect on the monitor performance.

c. The resolution which is not supported will appear at the resolution which gets near

to the resolution which is supported. * The standard of the resolution which gets near : H/V sync.

Warranty

Warranty

Your Aquavision television has a 1 year return to base warranty. The warranty means that if technical assistance is needed as a consequence of an error in a component, or if AQUAVISION®'s products do not meet a reasonable standard, then the television can be repaired or replaced at the manufacturers' discretion - please find the details at the end of this section or contact your supplying agent. Please be aware that the Aquavision warranty does not cover any of the following scenarios. If the television

- a. has been used in an unauthorised manner.
- b. has not be maintained, installed or cleaned correctly.
- c. has been exposed to unexpected external forces.
- d. has been opened or disassembled in any other way than as stated.
- Finally, the warranty is only valid in the country where the product was initially purchased.

Pixel Errors

Despite the fact that Aquavision televisions are based upon the most advanced recent technology, it is not possible to totally avoid pixel errors on the television as the panel consists of millions of transistors. It is however only a small fraction of Aquavision televisions which are affected by this. Dot defects in the panel, pixel errors, can be seen as very bright or dark dots on the monitor. Normally, the very bright dots will be red, green or blue and very small. A television like Aquavision is constructed, so that every one of the pixels consists of three sub-pixels, which light as red, green or blue. Each sub-pixel is again constructed out of 8 transistors, so any sub-pixel can show 256 shades, and the total panel as a whole is able to provide 24 bit colours (3 sub-pixels X 8 transistors).

Troubleshooting

Problem	Check Item
No picture on screen and no sound from speakers.	Insert the AC power cord plug securely in AC power outlet. Make sure the remote control is not on standby.
No picture/No picture from AV terminal.	Check the brightness setting of the display. Lamp may have malfunction. Make sure a cable with no VIDEO input signal is connected to the S-VIDEO INPUT terminal.
Picture is displayed, but no sound from the speakers.	Check the sound setting. Make sure the sound is not muted. Make sure the speakers are connected properly. Make sure the connectors of the optional speaker system are securely inserted.
Picture is too light.	Make sure COLOUR and CONTRAST settings are adjusted correctly.
Picture is too dark.	Make sure BRIGHTNESS setting is not set too low. Check to see BRIGHTNESS setting. Lamp may have malfunction.
Remote control does not work.	Change the batteries. Make sure the infrared transmitter window is not receiving strong light such as light from fluorescent lamps.
No picture from AV OUT terminal.	Make sure AV INPUT is not set. Make sure the input source is set to other than AV.
The picture is not sharp. The picture moves.	The reception may be weak. The state of the broadcast may also be bad. Make sure the antenna is facing the right direction. Make sure the outside antenna is not disconnected.
The picture is doubled or tripled.	Make sure the antenna is facing the right direction; There may be reflected electric waves from mountains or buildings.
The picture is spotted.	There may be interference from cars, trains, high voltage lines, neon lights, etc. There may be interference between the antenna cable and power cable. Try positioning them further apart.
There are stripes on the screen or colours fade.	Is the unit receiving interference from other devices? Transmission antennas of radio broadcasting stations and transmission antennas of amateur radios and cellular phones may also cause interference Use the unit as far apart as possible from devices that may cause possible interference.
